

David Boyle

Manager of Engineering

Dave Boyle is the Manager of Engineering. He joined the Ventec team in 2013.

Dave started his 27 year career in electrical engineering as a navigation/avionics design engineer with King Radio. He went on to play a senior role with Magellan Systems, an early pioneer in hand-held GPS systems. In 1997, Dave joined Pulmonetic Systems to develop the LTV ventilator. From 2001 to 2011, Dave was the Director of Engineering for Pulmonetic Systems and continued as the Director of Engineering through a series of spin offs from Viasys to Carefusion. In 2011, Dave moved to Newport Medical to serve as the Engineering Director of Critical Care Products, and remained through the subsequent acquisition by Covidien.

Dave graduated from the University of California Los Angeles with a degree in electrical engineering. Dave is the inventor on eight patents in the areas of medical device and consumer product design.
