

VOCSN Integrated respiratory care for ALS

"You have changed the fight against ALS and I know you will not stop now...you are giving people hope to remain active while getting the best equipment in one machine."

— Pat Quinn, Founder of Quinn 4 the Win and Co-Founder of the Ice Bucket Challenge

What is VOCSN?

VOCSN is the first and only Multi-Function Ventilator that combines multiple respiratory therapies—traditionally provided by separate pieces of equipment—into one device.

Customizable to your needs

- With a comprehensive set of modes and settings, VOCSN can be used for non-invasive ventilation with a mask, invasive ventilation with a tracheotomy, or mouth-piece ventilation. VOCSN can adapt to the evolving respiratory needs of pALS.

Available for everyone

- Recent updates to HCPCS E0467 means all ventilator users qualify for VOCSN regardless of past device use. To qualify you need a prescription for a ventilator plus one additional therapy (oxygen, cough, suction, or nebulizer).

Simple. Mobile. Care Changing.

- With intuitive touchscreen operation, packing multiple therapies in one 18 pound device with up to 9 hours of on-board battery, VOCSN streamlines patient care.

VOCSN Benefits

Up to 9 Hours of Power
Freedom all day.

Everyday Mobility
Five therapies, one device.

Touch Button Therapies
One circuit, no switching.

Faster Therapy
Care in seconds, not minutes.

70% Lighter*
Less to carry, easier to travel.

Homecare Reimbursement
Better payment for better care.

3X Quieter*
Discrete multi-therapy delivery.

Comprehensive Reporting
Customized breathing comfort.

*As compared to traditional ventilator, oxygen, cough, suction, and nebulizer devices.

VOCSN

The first and only Multi-Function Ventilator

Ventilation

VOCSN brings next-generation technology, breathing comfort, and ease of use to ventilator patients.

Oxygen

The VOCSN internal oxygen concentrator and Oxygen Direct™ system deliver the equivalent of 6 L/min of oxygen. External oxygen sources can be connected when needed.

Cough

Touch Button Cough™ therapy can be activated in seconds, without changing the circuit.

Suction

The quiet, hospital-grade suction system is easy to transport.

Nebulizer

VOCSN records each medication use and turns off the nebulizer when the therapy is complete.

“The simplicity and ease of moving from one therapy to another is unbelievable.”

— Pat Quinn Sr., cALS

One Device. One Code.

VOCSN is covered by Medicare, Medicaid, and Private insurance under a new HCPCS code E0467. VOCSN is one device that will provide for the evolving respiratory needs of pALS.
